

Meeting Minutes

03-25-18

6:30 (ISM GROUP: Derek, Horatio, Alyssa) 7:30 ENTIRE GROUP MEETING

Isaiah Johnson, Derek Brown, Alyssa Drohan, Horatio Hodge, Jarrett Horton,
Daniel Gaisberger

ISM GROUP held a meeting at 630 to get a better understanding of what needs to be accomplished regarding RAD document and Test Cases; Roles were assigned into what needs to be accomplished in upcoming weeks. Derek assigned Horatio and Alyssa to work on test cases while Derek works on RAD document. This will consist of Derek going through GitKraken and the actual stockapp application in order to implement the proper use cases needed. Once that is being updated daily, Horatio and Alyssa will be sequentially adding test cases based off the new use cases being implemented. Jarrett sat down with everyone and did the accountability worksheets.

***Issac and Russell was not there**

- Jarrett: Will continue to work on bugs as he finds them and assigning people tasks on Glo to have accountability through the group. Add Python Reports with D3
- Daniel: Will work on bugs as he finds them and will be working with Jarrett closely to tidy up the stock app and make it look good, A lot of the databases fixes he's working with and coding of application.
- Russell: Continuing to add currency conversion to all graphs fx convert, CSS for forgot password, work on creating tutorial for the application
- Isaiah: continue tooltip on live button when stock market is closed that way it lets the user know, work on creating tutorial for the application
- Horatio: Will work on Test Cases with Alyssa and testing for bugs as well
- Derek: Will work on updating RAD Document and doing meeting minutes. Assigned Alyssa and Horatio to work on test cases together parallel to Derek while updating the use cases (RAD Document) daily
- Alyssa: Will work on test cases with Horatio and testing for bugs as well
- Isaac: Add checking to table in newIndexJS to make sure that at Least one stock is in portfolio. That way a batch request is not issued for 0 stocks, Handle login 404() error when a user enters a wrong email, password combination, work on creating tutorial for the application
